Passionate about scientific research, I started a career in industry after completing my MSc in Computational Science and Engineering. I spent over three years at Schindler's R&D, in two of which I led the Schindler EPFL Lab. Since 2021 I have been pursuing a PhD in Computational Neuroscience and Artificial Intelligence at EPFL, supervised by Prof. Alexander Mathis. My main research interests are reinforcement learning and adaptation, with a focus on complex and high-dimensional control systems. My research highlights include first author publications at NeurIPS (2022, 2023) and Neuron (2024), and victories in multiple NeurIPS competitions (MyoChallenge 2022 and 2023, Auto-bidding Challenge 2024).
